- 📍 95 Mậu Thân , Xuân Khánh, Ninh Kiều, Cần Thơ

SKILLS

PROFESSIONAL SKILLS

- NodeJS(ExpressJSS, NestJS)
- C#, Go, Python, JS,
- Resful API.
- Microservice
- Github & Git, Postman, Docker
- RabbitMQ
- MySQL, SQL Server, Postgres SQL,
- Cloud (Deploy website to AWS).
- OOP.

SOFT SKILL

- Communication skills, clearly and concisely conveying ideas and work content.
- A spirit of self-learning and curiosity to explore relevant knowledge and issues.
- Effective problem-solving skills.
- Able to communicate and read English at a fair level

CERTIFICATES

28/4/2025

- TOEIC 470 :Able to communicate, read, write, and speak English at a good working level.

CAREER GOAL

With a solid foundation in programming and the ability to complete projects quickly, I aim to develop my career in the field of information technology, particularly in software development and artificial intelligence. I aspire to become a technical expert, contributing to innovative projects and delivering practical value to businesses and the community.

EDUCATION

🎓 **CAN THO UNIVERSITY**   //   **2021 - 2025**

NFORMATION TECHNOLOGY (HIGH QUALITY)

Participated in various projects and workshops to enhance practical knowledge and teamwork abilities.
Completed all coursework, expected graduation in December 2025

Kinh nghiệm làm việc

💼 **Backend Developer Intern**   //   6/2025 - 8/2025

Teknix Corporation

Developed and deployed backend services to interact with blockchain for fintech projects by Go language.
Built APIs for data crawling and wallet management on blockchain networks such as Tron Network, Binance Smart Chain (BSC), etc.
Optimized performance and ensured security in blockchain system integrations.

PROJECT

📝 **TRACEABILITY OF GRAPEFRUIT USING BLOCKCHAIN TECHNOLOGY.**

//   **5/2024 - 3/2025**

BACK-END Developer

Developed a Node.js and blockchain backend for grapefruit traceability, ensuring security and transparency with QR code authentication.: Members: 4 (Teamleader) /
Video demo project:
https://drive.google.com/file/d/1a9jKhJuaVWz5DNm1eBVUSIB4oO35UbLS/view?usp=sharing
Github:: https://github.com/vthuan-dev/Blockchain-Traceability.git
Technology used:
NodeJS, Solidity, MySQL, Blockchain,...
- Developed a grapefruit traceability backend with Node.js and blockchain.
- Managed user and logistics functions, ensuring data security.
- Integrated account and warehouse management.
- Supported QR code scanning for traceability.

📝 **E-COMMERCE WEBSITE INTEGRATED WITH RECOMMENDATION SYSTEM**

//   **9/2024 - 12/2024**

FULLSTACK DEVELOPER

Created an e-commerce site with a recommendation system using content-based, collaborative, and hybrid models.: Members : 1

Github:: https://github.com/vthuan-dev/Recommender-System

Technology used:

ExpressJS, Flask, VueJS, Bootstrap, Websocket, MySQL,..

- Developed the entire e-commerce website, from frontend to backend.
- Designed and implemented a personalized recommendation system using content-based, collaborative, and hybrid models.
